The Carter Oil Company P. O. Box 3082 Durango, Colorado

Attention: J. A. Browning, Development Foreman

Gentlemen:

This is to acknowledge receipt of your notice of intention to drill Well No. Navajo Tract 13-4, which is to be located 740 feet from the north line and 500 feet from the west line of Section 12, Township 41 South, Range 24 East, SLBM, San Juan County, Utah.

Please be advised that insofar as this office is concerned, approval to drill said well is hereby granted.

This approval terminates within 90 days if the above mentioned well is not spudded in within said period.

Yours very truly,

OIL & GAS CONSERVATION COMMISSION

ATTACHMENT I

RULE I-5: Application for Approval of Class II Injection Wells

- (a) Well Data Sheets.
- (b) (1) Plat #1.
 - (2) Well Data Sheets.
 - (3) Well Data Sheets & Logs.
 - (4)
 - i. The average intervening thickness is 4000' between the existing injection interval and the deepest fresh water sand.
 - ii. Maximum Surface Pressure: 2800 psig. Maximum Rate: 4000 BWPD.

FORMATION	DEPTH	LITHOLOGY
Chinle DeChelly Organ Rock Hermosa Upper Ismay Lower Ismay Gothic Desert Creek Chimney Rock	1300' avg. 2350' avg. 2600' avg. 4400' avg. 5300' avg. 5450' avg. 5460' avg. 5550' avg.	Shale Sandstone Shale Limestone Limestone Limestone Shale Limestone Shale Shale

- (5)
- (i) A throttling valve is installed on the wellhead to control injection rates and pressures.
- (ii) The source of injection water is Superior's production wells within the McElmo Creek Unit. The wells produce from the Ismay and Desert Creek formations with approximate depths of 5300' and 5460' respectively.
- (iii) The analysis of injection water is as follows: (as parts per million).

PH: 6.5 Ca: 13770 ppm S04: 25 ppm CL: 16700 ppm Mg: 11421 ppm H2S: 30 ppm Fe: 3 ppm HCO3: 109.8 ppm Ba: -

CaCO3: 18470 ppm CO3: - Specific

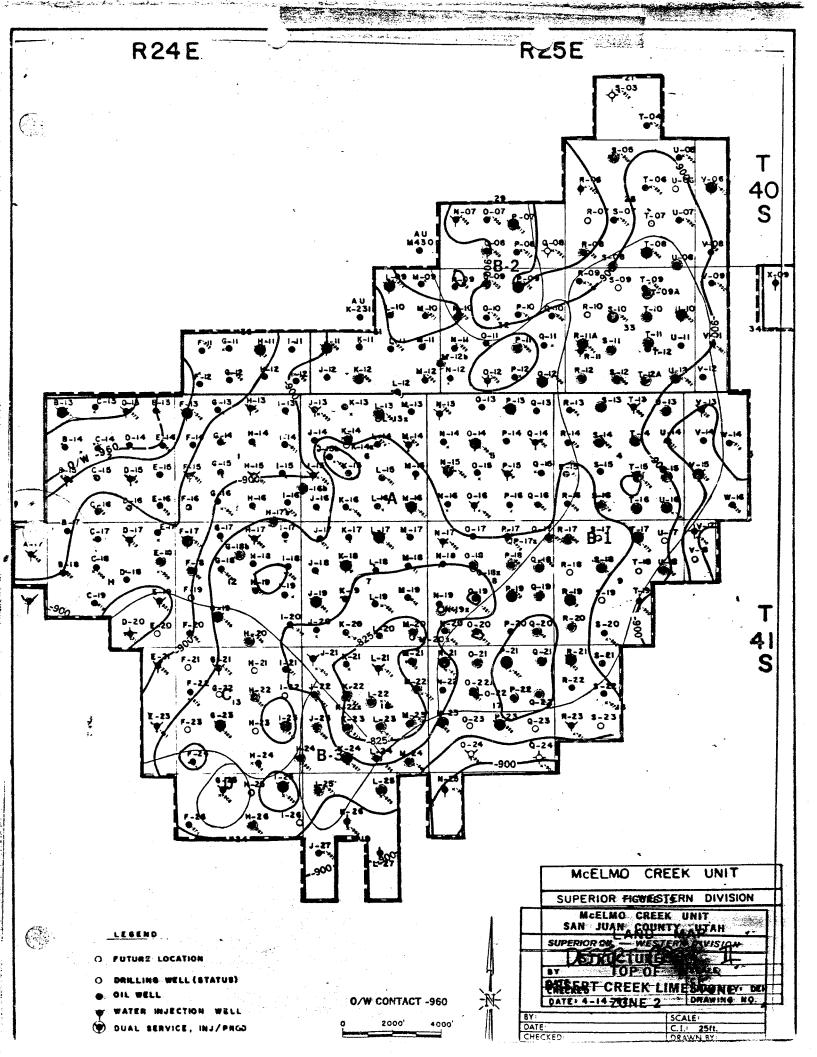

Gravity: 1.0553

- (5) Cont.
 - (iv) The injection zones are the Ismay and Desert Creek formations. Both zones are carbonate formations consisting of limestone, anhydrite and dolomite. The formations extend throughout the Paradox Basin and are underlain by the Chimney Rock Shale and are overlain by the Hermosa Limestone.
 - (v) Fresh water zones (Morrison, Bluff, Entrada) range from 0 to 1300' with Entrada being the deepest and somewhat saline.
 - (vi) The analysis of formation water (Desert Creek) is as follows: (as parts per million).

PH: 6.6 Ca: 17410 ppm SO4: 33 ppm CL: 34800 ppm Mg: 11518 ppm H2S: 10 ppm Fe: 1.5 ppm HCO3: 48.8 ppm Ba: - Specific

Gravity: 1.0902

- (6) To assure that injection is confined to intervals intended to receive the disposed water, wireline diagnostic surveys are run periodically to determine whether any escapement is taking place. If such information is discovered, the disposal well will be shut-in until proper measure can be taken. Casing pressure readings are made regularly to verify that no tubing or packer leaks have developed. If such leaks develop, the well will be shut-in until proper repairs can be made.
- (7) N/A.
- (8) The Division will be notified of the date and time to monitor the mechanical integrity test.
- (9) N/A.
- (10) N/A.

At the end of complete Driller's Log, add Geologic Tops. State whether from Electric Logs or samples.

F

HISTORY OF OIL OR GAS WELL

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shets. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing.

NAVIJO TRACT 13 #4

TD 5560', PBTD 5522'. Perforated 5506-13' with two shots per foot, set packer @ 51.39', spotted 200 gallons MCA across perforations and held 40 minutes, no recovery. Perforated 5464-5506' with two shots per foot, treated with 300 gallons MCA. Packer set @ 5389', held acid on perforations two hours, swabbed back. Treated perforations 5461-5513' with 6800 gallons regular 15% acid plus 78 mylon balls. Four hour test, recovered 80 barrels oil, no water. Killed well. Set bridge plug @ 5458', perforated 5406-19' and 5432-53' with two shots per foot. Packer set @ 5326'. Spotted 250 gallons MCA across perforations. Swabbed and flowed back load oil and 250 gallons Treated with 4800 gallons regular 15% acid plus 78 nylon balls. Flowed on test four hours, recovered 78 barrels oil. Killed well. Drilled out plug @ 5458:. dreve to 5522'. Set bridge plug @ 5389', perforated 5321-51' and 5358-74' with two shots per foot. S potted 300 gallens MCA across perforations, swabbed back with no show of oil or gas. Treated perforations with 5800 gallons acid plus 86 nylon galls. Flowed on test four hours, recovered 34 barrels oil. Drilled out plug @ 5389, drove to 5522. Well completed December 23, 1958, flowing through 3/8" choke from perforations 5321-51', 5358-74', 5406-19', 5432-53' and 5464-5513'.

THE CARTER OIL COMPANY

P. O. Box 3082 Durango, Colorado January 8, 1959

Mr. Cleon B. Feight
State of Utah Oil and Gas Conservation Commission
310 Newhouse Building
Salt Lake City 11, Utah

Dear Sir:

In regard to your telephone conversation with our Mr. W. H. Bake, please be advised that The Carter Oil Company's Navajo Tract 13 well No. 4 located in the $N\frac{1}{4}N\sqrt{\frac{1}{4}}$ Section 12-T41S-R25E, San Juan County, Utah, has been completed. We will comply with your three months rule on submitting information and will appreciate the information being held confidential for the maximum period of time. Also, it will be appreciated if you can remove from your active files all information on the Navajo Tract 13 lease for all wells and hold the same confidential.

Very truly yours.

B. M. Bradley

THE SUPERIOR OIL COMPANY

P. O. DRAWER G CORTEZ, COLORADO, 81321

January 16, 1967

NOTE: There were 308,660 runs or sales of oil 228,179. MCF of gas sold; no runs or sales of gasolina during the month of 200,1966

TO ALL WORKING INTEREST OWNERS McELMO CREEK UNIT

Gentlemen:

Attached is the Unit production report for December, 1966.

Production:		-	242,373				9,957 7,818	
Injections	Frach	L.I.o.	tor	_ 1	382 026	bb1	/./	610

Injection: Fresh Water - 1,382,926 bb1 44,610
Produced Water - 929,588 bb1 29,987
Aneth Unit Water - 158,990 bb1 5,129
Total - 2,471,504 bb1 79,726

Daily average oil production increased 292 BOPD over November. The GOR decreased 75 cubic feet per barrel.

The production increase is the result of the successful workover of well #R-15. This well was squeezed with 400 sacks and perforated in the Ismay and Zone I. Zone I was treated with 12,400 gallons 28% acid and flowed 408 bbl fluid in 14½ hrs. following the treatment. The Ismay was then treated with 3,000 gallons 28% acid and flowed 776 bbl fluid in 21½ hrs. following the treatment. The Ismay only was produced during December and flowed at an average rate of approximately 375 BOPD.

Well #V-17 was squeezed with 200 sacks and reperforated 5630-33, 5638-62, 5665-68. These perfs were treated with 5400 gallons 28% acid on December 15, 1966 and the well was hooked up to the injection system with a temporary injection line. Water was injected into the well at approximately a 50 BPD rate for eleven days. The injection line then froze, so injection into this well has been discontinued. The USGS will consider December 15, 1966 as the completion date of this well.

Well #F-11 was squeezed with 295 sacks, perforated in Zone I, and stimulated with 10,500 gallons 28% acid. Production several days after completion was 35 BOPD and 22 BWPD. This is a disappointingly

low production rate; however, production prior to the workover was only 8 BOPD and 33 BWPD.

Well maintenance during December consisted of the following:

9 Rod Parts: G-18, I-18 (2), J-21, J-25, Q-20, R-09, T-09, T-11.

10 Pump Changes: H-20, L-15, L-19, L-21, N-19, O-08, Q-20, S-14, T-09, T-11.

Very truly yours,

W. H. Fraser

DDK/njh Attach.

Attn: R. J. Firth

Associate Director

DIVISION OF OIL, GAS & MINING

SUPERIOR OIL COMPANY MERGER

Dear Mr. Firth:

On September 20, 1984, The Superior Oil Company (Superior) became a wholly owned subsidiary of Mobil Corporation. Since January 1, 1985, Mobil Oil Corporation (MOC), another wholly owned subsidiary of Mobil Corporation, has acted as agent for Superior and has operated the Superior-owned properties.

On April 24, 1986, Superior was merged with <u>Mobil Exploration and Producing North America Inc. (MEPNA)</u>, which is also a wholly cwned subsidiary of Mobil Corporation. MEPNA is the surviving company of the merger.

This letter is to advise you that all properties held in the name of Superior will now be held in the name of MEPNA; and that these properties will continue to be operated by MOC as agent for MEPNA.

Attached is a listing of all wells and a separate listing of injection-disposal wells, Designation of Agent and an organization chart illustrating the relationships of the various companies. If you have any questions or require additional documentation of this merger, please feel free to contact me at the above address or (303) 298-2577.

Very truly yours,

R. D. Baker

Environmental Regulatory Manager

McElmo Creek Unit F-17 Workover Procedure

- 1. Dig, line and fence a 100+ bbl earth pit. MIRU coiled tubing unit with 1-1/4" coiled tubing. MI Standby Safety Services (303/565-6391) having 5 Scott 30 minute airpacks, five minute escape packs for all coiled tubing/acid stimulation crew, personal H2S monitors for all personnel on location, and one safety man. Acid stimulation company to provide eye wash station. Hook up coiled tubing to water injection line. Lay flow line from wing valve to a choke manifold having two adjustable chokes. Lay flowline from choke manifold to earth pit. Stake and chain flowline down. PT coiled tubing to 6000 psi using injection water.
- 2. RIH with 1-1/4" coiled tubing with perforation wash nozzle and CO to PBTD at 5387' using injection water at maximum circulating rate at maximum circulating pressure of 5000 psi. If unable to CO fill using injection water, attempt to clean out fill using 10 bbl of 15 percent HCL acid containing 2 gals/mgals corrosion inhibitor, and 10 lbs/mgals iron sequestering agent, neutralizing any unspent acid that returns to pit. If unsuccessful in cleaning well out, POH, RIH with 1-3/4" dynadrill on 1-1/4" coiled tubing and drill out fill. POH.
- 3. MIRU wireline unit with lubricator. RIH with 1-11/16" GR/CCL and log from PBTD through injection packer. POH. Turn off all radios/cellular telephones on location and post warning signs for radio/cellular telephone silence at all roads within 100 yards of location. RIH with 1-11/16" magnetically decentralized hollow steel carrier perforating guns loaded with 3.2 gram RDX charges at 4 SPF, 0 degree phasing and perforate 5358'-5383' and 5321'-5351'. POH. RDMO wireline.
- 4. RU coiled tubing. Pickle coiled tubing with 3 bbls of 15 percent HCL acid, reverse out to pit and neutralize. RIH with 1-1/4" coiled tubing with perforation wash nozzle and spot 5 bbls of xylene across perforations. Let soak for 1 hour. Displace with fresh water. Wash perforations without taking returns using 2 bbls/ft of 15 percent HCL acid. NOTE: All acid pumped into well to contain 2 gals/mgals corrosion inhibitor, and 10 lbs/mgals iron sequestering agent. Pump rate should be maximum injection rate at 5000 psi surface injection pressure. Overdisplace acid using fresh water. POH. RDMO coiled tubing unit and all surface equipment.
- Pump out and backfill pit. Turn well over to production leaving well shut in.

DIVISION OF OIL, GAS & MINING

SUPERIOR OIL COMPANY MERGER

Dear Mr. Firth:

On September 20, 1984, The Superior Oil Company (Superior) became a wholly owned subsidiary of Mobil Corporation. Since January 1, 1985, Mobil Oil Corporation (MOC), another wholly owned subsidiary of Mobil Corporation, has acted as agent for Superior and has operated the Superior-owned properties.

On April 24, 1986, Superior was merged with Mobil Exploration and Producing North America Inc. (MEPNA), which is also a wholly cwned subsidiary of Mobil Corporation. MEPNA is the surviving company of the merger.

This letter is to advise you that all properties held in the name of Superior will now be held in the name of MEPNA; and that these properties will continue to be operated by MOC as agent for MEPNA.

Attached is a listing of all wells and a separate listing of injection-disposal wells, Designation of Agent and an organization chart illustrating the relationships of the various companies. If you have any questions or require additional documentation of this merger, please feel free to contact me at the above address or (303) 298-2577.

Very truly yours,

R. D. Baker

Environmental Regulatory Manager

June 27, 2001

Mr. Jim Thompson State of Utah, Division of Oil, Gas and Mining 1549 West North Temple Suite 1210 Salt Lake City, UT 84114-5801

Change of Name – Mobil Oil Corporation to ExxonMobil Oil Corporation

Dear Mr. Thompson

Effective June 1, 2001, Mobil Oil Corporation (MOC) changed its name to ExxonMobil Oil Corporation (EMOC). This was a name change only; EMOC is the same corporation as Mobil Oil Corporation, but with a new name. No facility or other asset was transferred from one corporation to another by virtue of the name change. Specifically, EMOC will remain the owner and operator of its existing exploration and production oil and gas properties and facilities, as well as relevant permits.

There is no change to the name of Exxon Mobil Corporation, the ultimate shareholder of EMOC.

Please note the change of name of MOC to ExxonMobil Oil Corporation in your records pertaining to any MOC permits.

The Federal Identification Number for MOC (13-5401570) will remain the same for EMOC.

A copy of the Certification, Bond Rider and a list of wells are attached.

If you have any questions please feel free to call Joel Talavera at 713-431-1010

CERTIFICATION

I, the undersigned Assistant Secretary of ExxonMobil Oil Corporation. (formerly Mobil Oil Corporation), a corporation organized and existing under the laws of the State of New York, United States of America, DO HEREBY CERTIFY, That, the following is a true and exact copy of the resolutions adopted by the Board of Directors on May 22, 2001:

CHANGE OF COMPANY NAME

WHEREAS, the undersigned Directors of the Corporation deem it to be in the best interest of the Corporation to amend the Certificate of Incorporation of the Corporation to change the name and principal office of the Corporation:

NOW THEREFORE BE IT RESOLVED, That Article 1st relating to the corporate name is hereby amended to read as follows:

"1st The corporate name of said Company shall be,

ExxonMobil Oil Corporation",

FURTHER RESOLVED, That the amendment of the Corporation's Certificate of Incorporation referred to in the preceding resolutions be submitted to the sole shareholder of the Corporation entitled to vote thereon for its approval and, if such shareholder gives its written consent, pursuant to Section 803 of the Business Corporation Law of the State of New York, approving such amendment, the proper officers of the Corporation be, and they hereby are, authorized to execute in the name of the Corporation the Certificate of Amendment of Certificate of Incorporation, in the form attached hereto;

FURTHER RESOLVED, That the proper officers of the Corporation be and they hereby are authorized and directed to deliver, file and record in its behalf, the Certificate of Amendment of Certificate of Incorporation, and to take such action as may be deemed necessary or advisable to confirm and make effective in all respects the change of this Company's name to EXXONMOBIL OIL CORPORATION.

WITNESS, my hand and the seal of the Corporation at Irving, Texas, this 8th day of June, 2001.
